

Travel vaccine

Acharacle medical practice will only provide the following travel vaccines, which are available free under the NHS policy, these are:

Typhoid, Tetanus and the combined Hep A

Should you require any other vaccines because of the country you are travelling to, you would have to attend one of the private clinics listed below.

We can advise a patient of the names of travel clinics, and can provide a list of all the immunisations that a patient has received.

We would be unable to administer vaccines that patients have provided themselves, as we cannot guarantee that the cold chain has not been compromised during transit.

List of nearest travel clinics:
